Information

Format (5-10 minutes), optionally after observation

- The student explains the executed EPE and describes actions and findings.
- The student states actions and findings to relevant background knowledge (anatomy, patho-physiology, diagnostic tests and/or therapeutic options).
- Which risks and complications did the student take into account?
- What would the student have done differently with a patient of different gender, culture, medical history, or in case of unexpected findings?

Context

EPA: EPA 2.a. What parameters?
